INTERNAL PIN DIA

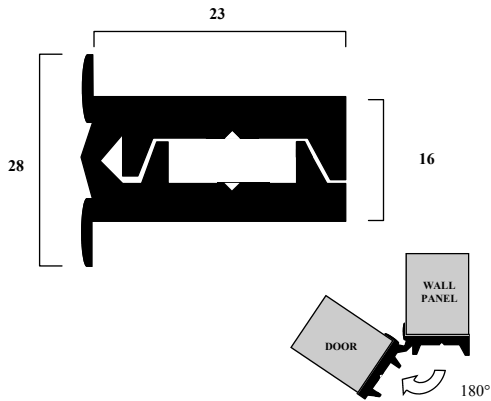

DESIGN 351 HINGE

- ◆ Heavy duty door hinge for doors 35mm thick.
- ◆ High strength aluminium alloy precision extrusion with exclusive mechanical principle that eliminates the familiar hinge pin – to provide the appearance of solid trim and yet operate through a full 180° rotation.
- ◆ Design 351 hinge joins door to frame along full length for a smooth, no-gap surface of immense strength. Sealed joint is eminently suited for areas which must be protected against humidity, light and noise.
- ◆ No cross-cuts or breaks. The full profile of each extrusion is joined along its entire length. Consider applications where pilfer-proofing and complete weather- sealing are needed.
